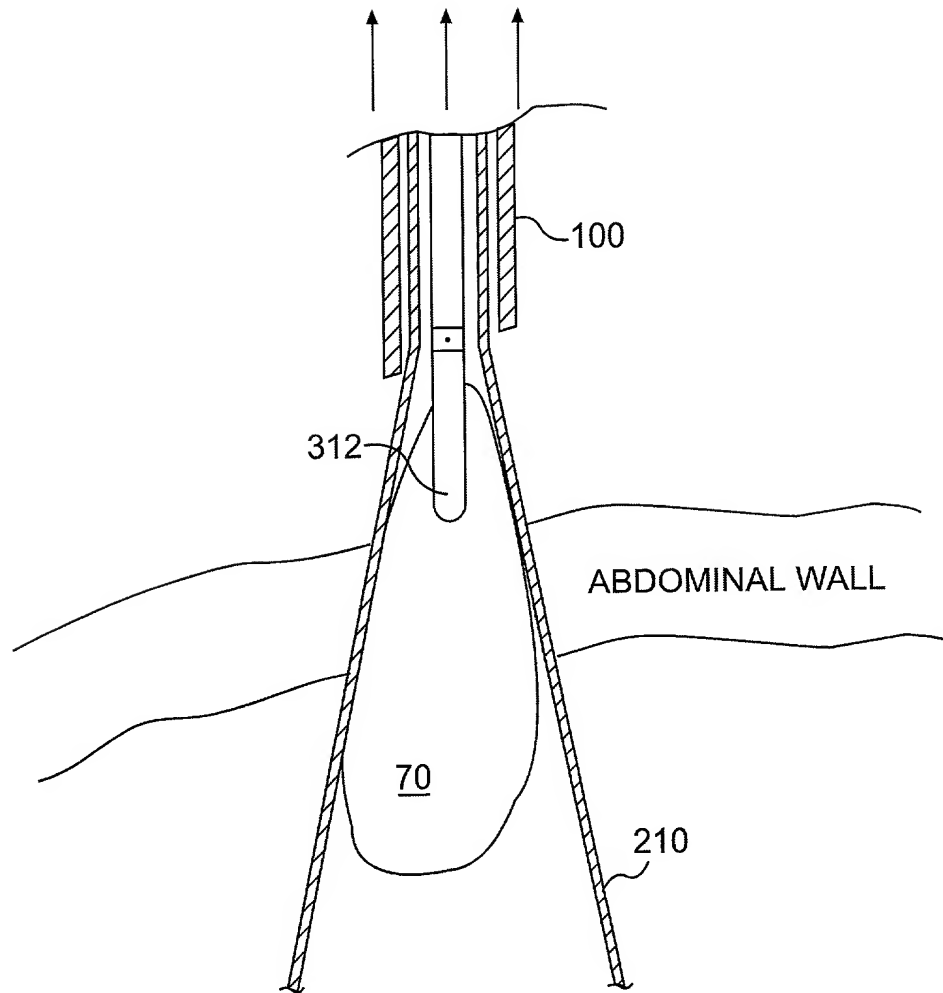

FIG. 10

FIG. 1 is a schematic cross-sectional view of a medical device 100 inserted into a body cavity 70. The device 100 has a proximal end with a handle and a distal end with a tip 234. The device is surrounded by a sheath 210 with a proximal opening 228. The device is positioned within a body cavity 70, which is bounded by an ABDOMINAL WALL. The device is shown in a retracted position, with the tip 234 near the ABDOMINAL WALL.
